# eRider ONLINE MOTORCYCLE TRAINING COURSE

## System Requirements

The eRider™ online classroom features highly interactive educational activities delivered directly to your browser.  To fully experience these modules and advance through the course, your computer or tablet must meet or exceed some minimum system requirements. Most desktop and notebook computers, and tablets purchased and updated since 2011, will have no problems with using the eRider™ online classroom.

The system requirements are intended to accommodate a wide variety of computers and tablets. In general, the eRider™ online classroom performs best with up-to-date software, but is still usable in older configurations. If you experience any issues with the system, please refer to this tool to make sure your system meets the requirements or to send Idaho *STAR* a detailed description of your system for testing purposes.
